About Recommended Base Area Sizes

The following dimensions are the physical size measurements for the base plinth of each greenhouse. These measurements act as the minimum area required to cater for the base of the greenhouse being in contact with the ground.

Your actual base area, however, should be slightly larger than the greenhouse base size.

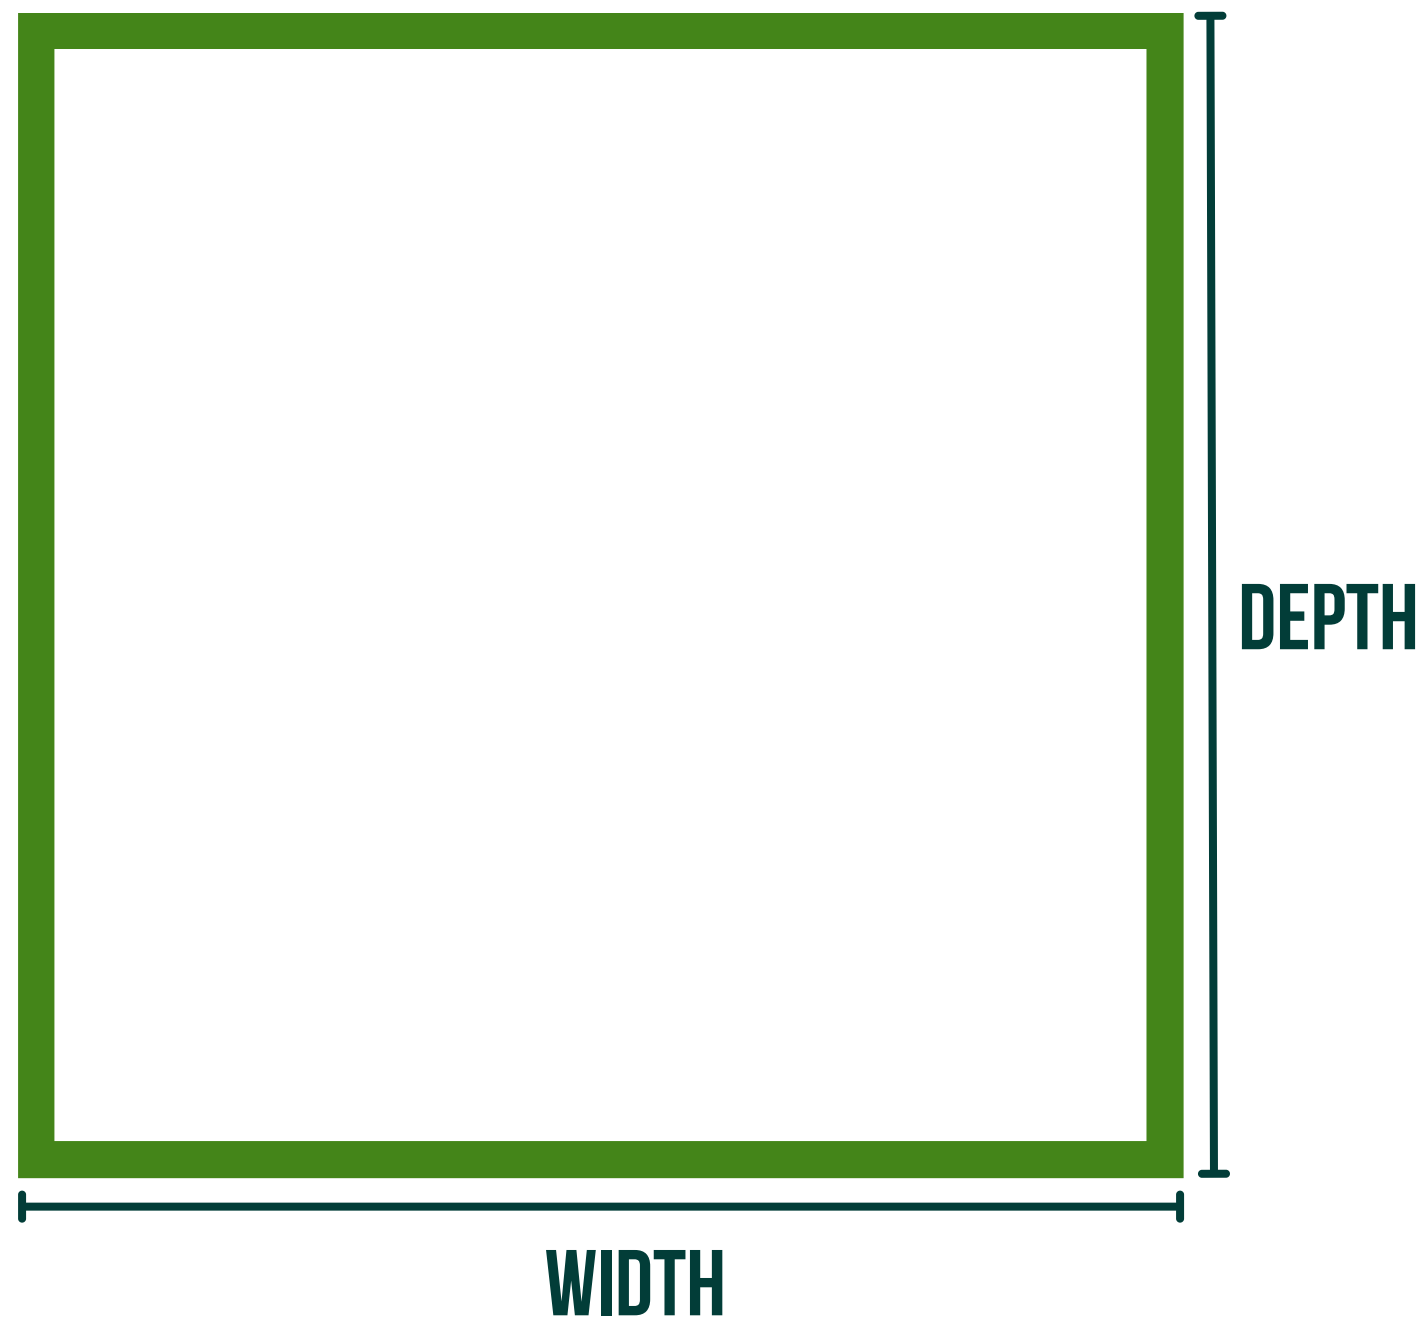

This is to take into account space for any anchor bolts, spikes, angle brackets, and any other way of securing the greenhouse to the ground.

- i** Base width and base depth sizes can differ from the dimensions found on individual product pages/specs. This is due to dimensions on product pages/specs being classed as "*external dimensions*", which take into account the thickness of the framing, any roof overhang, and any guttering overhang, which all increase the overall, external size measurements.

Greenhouse Base Size

Halls Cotswold Birdlip Range

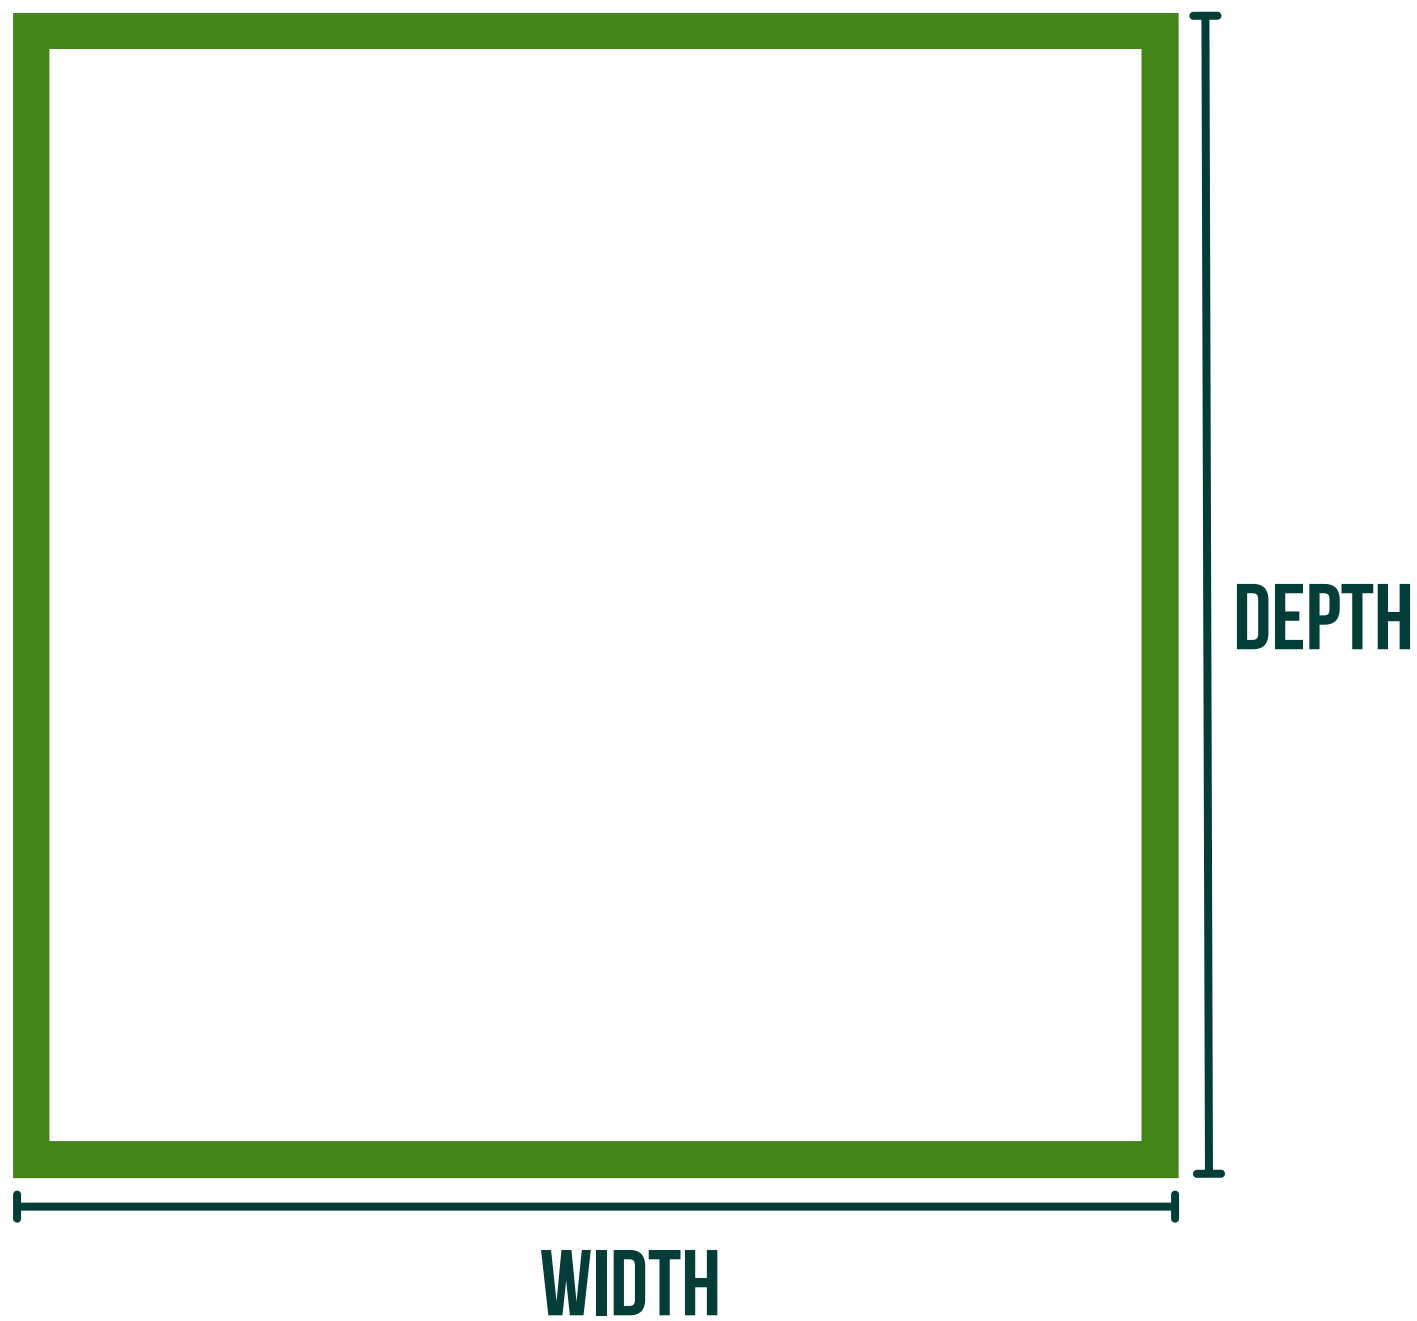

GREENHOUSE SIZE	4FT X 4FT	4FT X 6FT	4FT X 8FT
BASE WIDTH	1478MM	1478MM	1478MM
BASE DEPTH	1348MM	1966MM	2584MM

Greenhouse Base Size

Halls Cotswold Burford Range

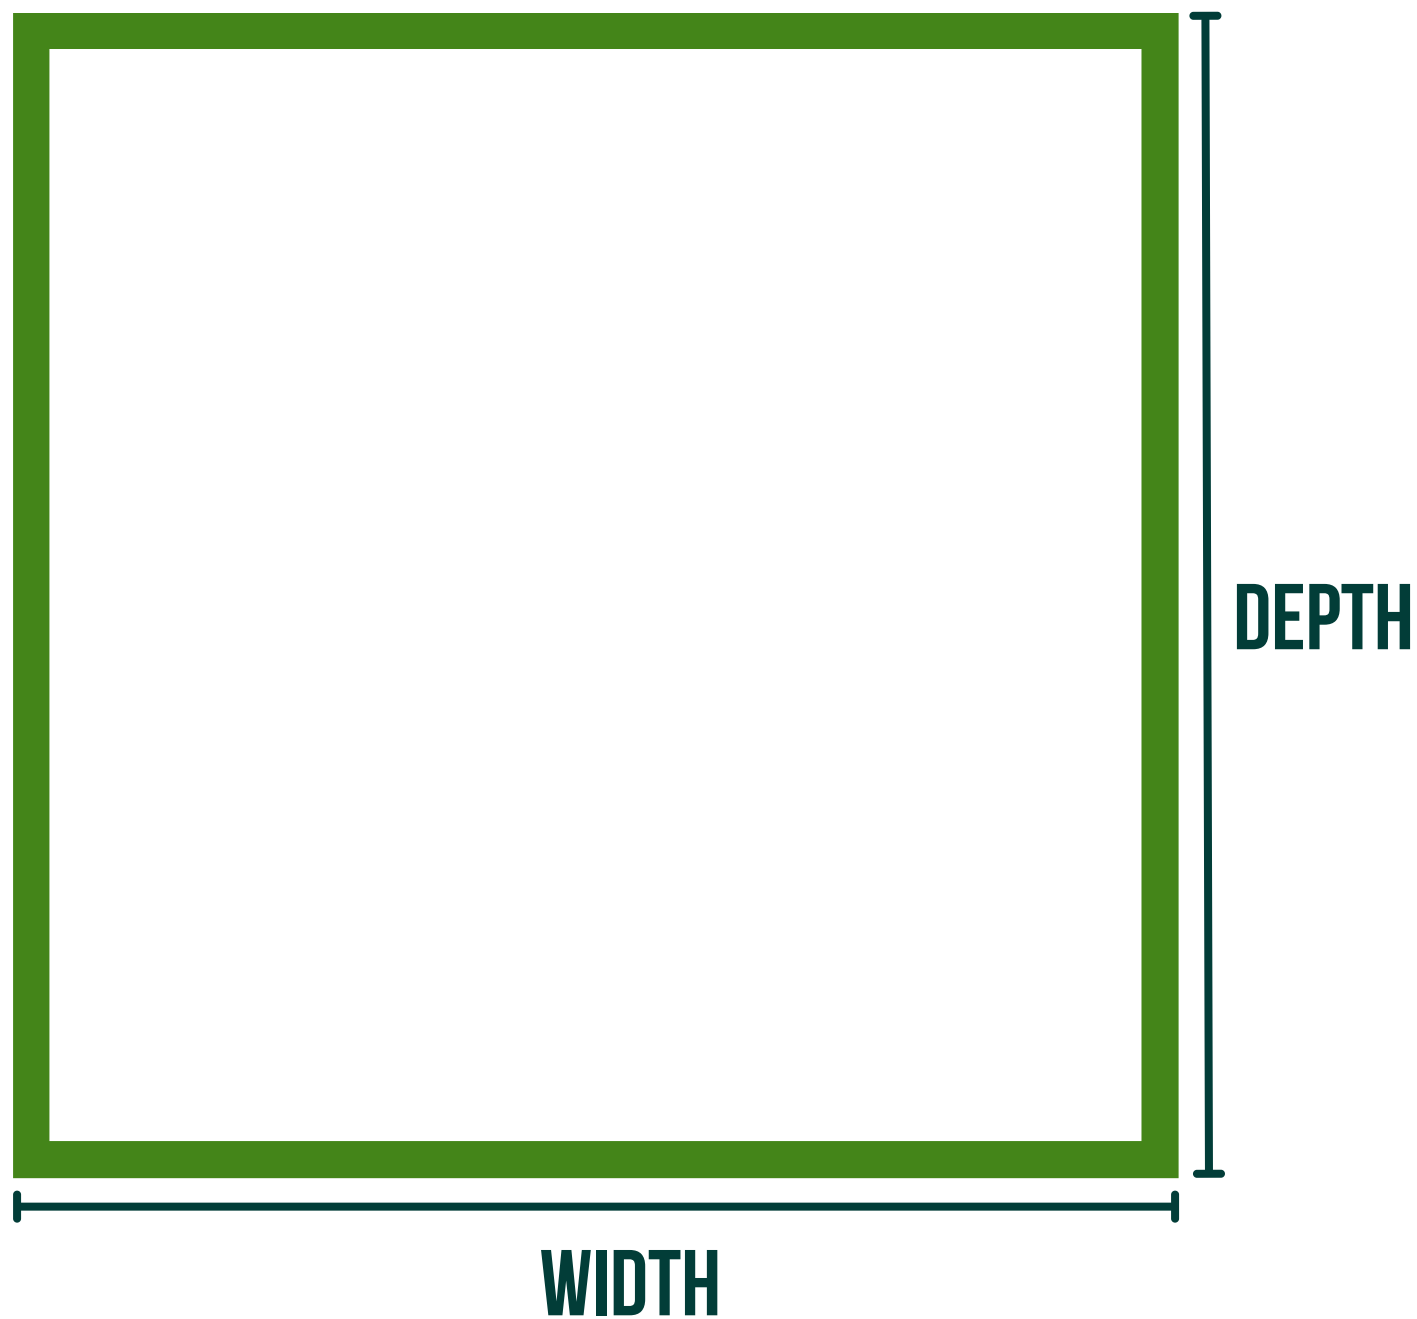

GREENHOUSE SIZE	6FT X 6FT	6FT X 8FT	6FT X 10FT
BASE WIDTH	1942MM	1942MM	1942MM
BASE DEPTH	1966MM	2584MM	3202MM
