

A nut is supplied for if attaching to brackets (sold separately) when fixing directly to glass the nut is not required.

- Unscrew the nuts at each end of the Blind.
- Note there are two types of Suctions Cup.
- Push a Suction Cup (with hole), onto each fixing as far as they will go. Be careful not to Pierce the inside of the Suction Cup. If this happens, the suction cup will need replacing.

- Wipe the Suction Cups with a damp cloth.
- Place the main body of the Blind at the top of preferred glass bay. **A**
- Push the Suction Cups onto the glass, if they need to be repositioned, pull the small nodule to release them from the glass.
- Pull the Blind down to the desired level.
- Fit the non hole Suction Cup in line with each of the white holders. **B**
- Hook the white holders onto the Suction Cups. **C**
